

ASP6025 S

Total Confidence in Every Tissue

SEEING IS BELIEVING - **NEW** ASP6025 S

Advancing Cancer Diagnostics
Improving Lives

Leica
BIO SYSTEMS

BOOST YOUR CONFIDENCE IN QUALITY AND RELIABLE TISSUE PROCESSING WITH THE **NEW** ASP6025 S

NEW ASP6025 S is designed to improve your lab's performance with quality-driven technology that optimizes tissue processing performance and supports rapid processing.

QUALITY-DRIVEN AND RELIABLE

The New ASP6025 S introduces the next-generation tissue processor with even more reliable and stable capabilities. Designed for fast turnaround times, the ASP6025 S processes up to 300 cassettes simultaneously.

INCREASE PROCESSING SPEED AND TISSUE QUALITY

The advanced magnetic stirrer technology is designed to optimize paraffin infiltration performance, helping reduce processing time and enhancing reagent exchange within the tissue cells.

TISSUE SAFETY: DENSITY METER TRACKING REAGENT CONCENTRATION

The built-in Density Meter effectively measures the concentration of each alcohol bottle in real time, showing the reagent status to ensure optimal usage of reagents for improved processing quality and reduced reagent consumption.

PRE-INSTALLED VALIDATED PROTOCOL

Leica Biosystems pre-installed validated protocols, along with xylene and low-temperature xylene-free protocols, giving you the flexibility to process different tissue types.

ASP6025 S

ASP6025 S Tissue Processor **Technical Specifications**

Dimensions (L x W x H):	680 x 750 x 1500 mm (26.77 x 29.53 x 59.05 inch)	Built-in backup battery	Backup battery ensures the specimens covered with appropriate reagent during a power failure
Weight (instrument only):	Approx. 210 kg (463 lbs)	Reagent management system (RMS):	Switch between RMS and concentration measurement
Cassette capacity:	Max. 300 cassettes	Carbon filter:	Efficient fume exhaust at retort lid and xylene-free protocols
Retort reagent volume:	Max. 4.8 L (up to fill level of third sensor, without specimen filling)	Remote fill and drain:	Remotely fill and drain the respective system bottle from an external station
Paraffin container capacity:	3 paraffin baths: 4.9 L each 1 pre-melt paraffin station: 5.0 L	Leica validated protocols:	Total 14 programs: 3 autorotation, 6 xylene (including fatty tissue) and 5 xylene-free
System bottles:	9 (in the reagent cabinet)		
RTU-bottles:	6 (in the drawer)		
Condensate bottle:	1		
Bottle volume:	3.8 and 5.0 L		
Password status:	Supervisor/operator/service		
Operating voltage and frequency:	100 to 120 V or 220 to 240, 50 to 60 Hz		

Leica Biosystems is a cancer diagnostics company and a global leader in workflow solutions, offering the most comprehensive portfolio from biopsy to diagnosis. Our mission of "Advancing Cancer Diagnostics, Improving Lives" is at the heart of our corporate culture. Our easy-to-use and consistently reliable offerings help improve workflow efficiency and diagnostic confidence.
