FIVE-TO NINE-FOLD INCREASE IN THE NUMBER OF CELLS ON A SLIDE¹

With the optional Cytopro® Rotor, the Aerospray Stainer becomes a superb cytocentrifuge with eight-slide capacity and programmability, at a fraction of the cost of purchasing a stand-alone cytocentrifuge.

AVAILABLE SAMPLE CHAMBERS

Patented flow control increases cell yield and delivers consistent results.

Standard Chamber

Combines ease of use with superb cell recovery.

Dual Chamber

Places two samples on the same slide for increased efficiency and economy.

Cytopro Magnum®

Accepts sample sizes up to 6 mL.

THE AEROSPRAY® PROCESS FOR HEMATOLOGY STAINING

THE STAINING STEPS

1 Smears are automatically fixed with methanol or with Aerofix® fixative (alternatively, slides can be hand-fixed using methanol).

2 With the choice of Rapid Wright Giemsa, Wright-Giemsa, May-Grünwald Giemsa, and Custom stain, all cellular components are presented clear and precise.

3 Thiazine and Eosin dyes join together to demonstrate all cellular components.

4 Two pH buffers allow for customization in color. Each clears out unbound stain leaving a clean image.

 High speed, low duration spin creates dry slides, ready for the microscope in minutes!

DETAILS MAKE THE DIFFERENCE

Simultaneous contact by both dyes produces the classic staining patterns with superior, textbook-quality results. The thiazine and eosin dyes are loaded separately onto the instrument to correct the reagent stability problems common to mixed stains. These stains are automatically combined and mixed prior to application to produce superior results. In fact, many customers purchase the Aerospray Pro just for its superior staining of bone marrow smears.

SUPERIOR STAINING FLEXIBILITY

Aerospray offers a versatile selection of 9 different intensities for each of the 4 set programs: Rapid Wright-Giemsa, Wright-Giemsa, May-Grünwald Giemsa, and Custom Stain with simple adjustment routines to tailor the staining to individual preferences.
