

URay A10

Veterinary Digital Radiography System

Highlight Features

*Mono-block portable
X-ray machine.
Space saving*

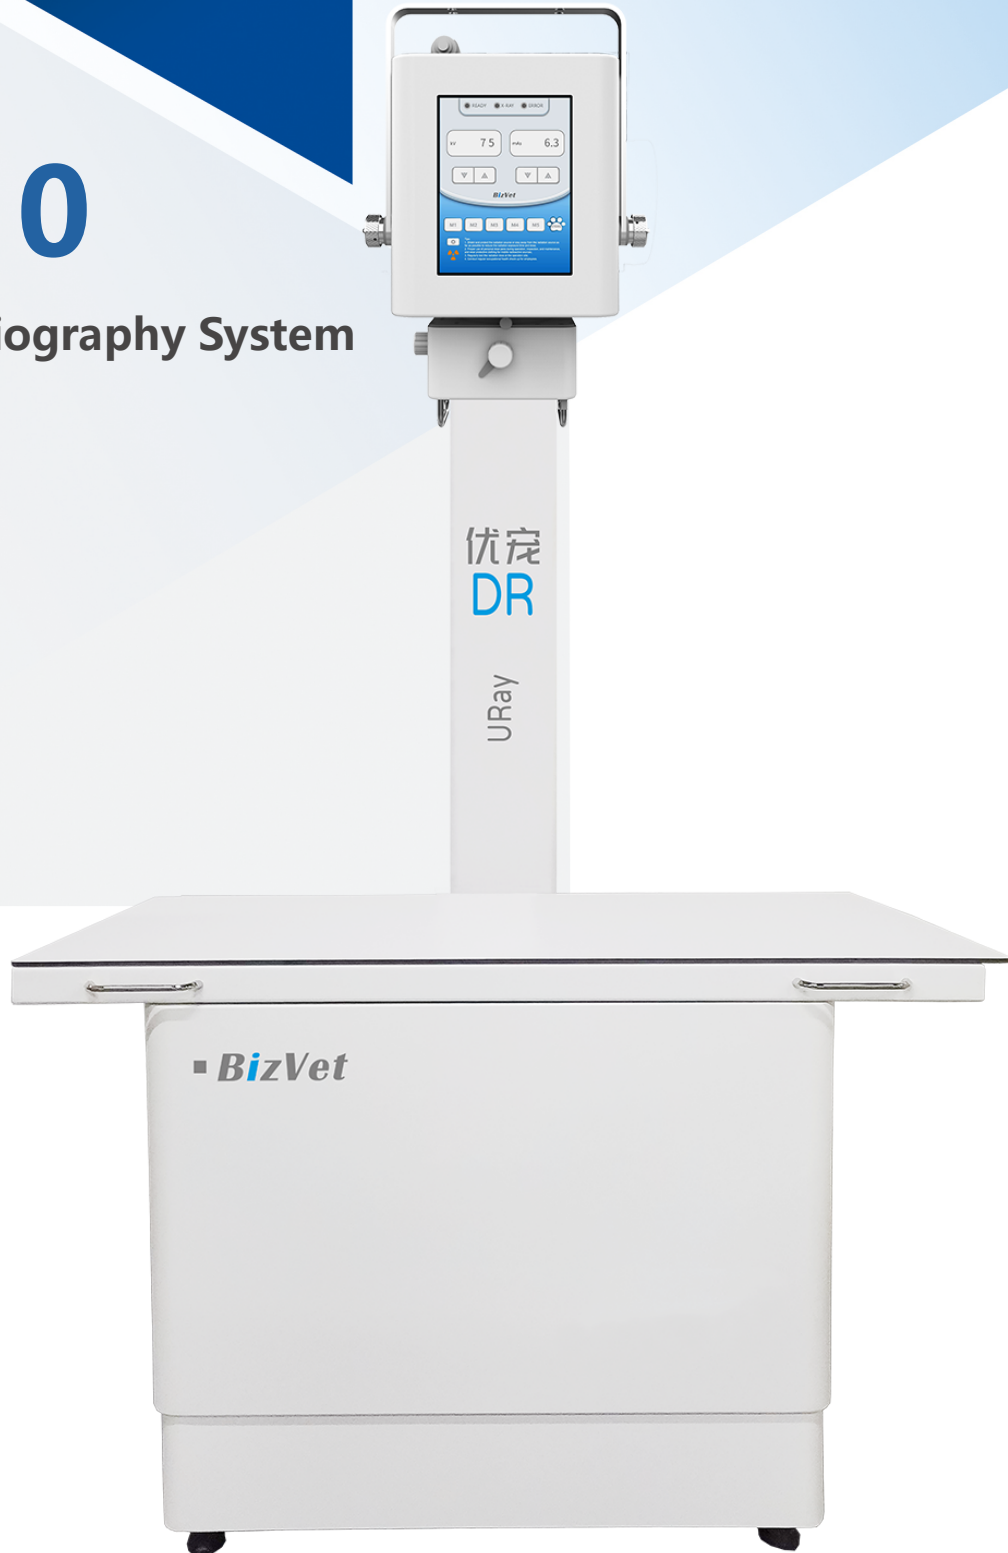

*Less radiation leakage.
Double lead-sealing
technology*

*Versatile usage for both DR
room and Field use.
3 exposure control modes*

*Plug-in 220V,
smart components for quick
installation*

Veterinary Digital Radiography System

- Compact design, suitable for field use, such as aquarium, zoo.
- Easy installation and maintenance, portable and space saving.
- Auto exposure parameters (kV, mA, mAs) via thickness synchronically.
- Powerful tools and professional measurements with Guided Markups: Smart VHS, TTA, TPLO, HD etc.
- TFT Detector with direct deposition CsI enables high DQE for better image with lower dose.

Accessories (Cat. No.)	Specification
